

PRESS RELEASE

La Garde (France), February 28 2022

Sales: 2021€12m (+8% at sc*)

A successful transition for the new management team.

In fiscal year 2021, CIOA generated revenues of €12 million (unaudited figures), up 8% on a comparable basis, broken down as follows

- Services: 38
- Industry: 35
- Licenses & royalties: 27%.

The financial year was also marked by the change in the company's headquarters and the regrouping of all activities on a new 6,000 m2 site, as well as by the change in management at mid-year.

This new management, led by Lionel LUCIDE (General Manager), Loïc LUCIDE (Industry Manager) and Yann ZELINE (Operations Manager), has been working on :

- To reinforce the added value of the Group's products and services, in a context of economic recovery, while preserving the strategic vision of their founding parents;
- Develop new operational resources to strengthen the Group's shared platform and pursue the domestic market penetration strategy initiated the previous year;
- To establish new partnerships, particularly financial ones, to give CIOA a new impetus for the years to come.

These different aspects will be communicated in the coming days.

ABOUT US

About CIOA:

Created in 1994, CIOA is a business engineering group listed on Euronext ACES (MLCIO) that develops an original system of pooling professional resources to provide its members - public and private organizations of all sizes and sectors - with innovative solutions to adapt to disruptions, create value and carry out complex projects.

To recruit and support users of its platform, CIOA runs a network of co-developers - service providers and value-added resellers - who provide intermediation, guidance and support services to members and assist them in their use of open access resources, to :

- Doing business internationally,
- Integrate digital into their business strategies,
- Industrialize production processes,
- To carry out unitary real estate projects or volume programs.

Unique in its kind, the CIOA's platform of shared resources responds to the key needs of our rapidly changing society:

- Increase the resilience of economic operators,
- Create diverse work opportunities and a motivating environment for freelancers,
- Facilitate access to low-cost, decarbonized buildings for residential, recreational and professional use everywhere.
